

220300 *One Size Collapsible Brass Shim*

220301 *Collapsible Heavy Gauge Shims*

The Golfmechanix "One size fits all" Universal Brass Shims are specifically designed to bridge the "fit gap" across a wide range of tolerances between mismatched shaft tips and hosel bores. The universal fit is made possible by impressing collapsible ribs along the "ears" of the shim. The ribs are designed to gradually flatten out as the shaft is driven firmly into the hosel. The spacing between the ears are sufficient for the adhesive to seep past and adhere to both the shaft and hosel wall. Each shim weighs just 0.75 grams (1.6 for the oversized shim) which has virtually no effect on swing weight. Two sizes of shims are offered for the following Shaft tip to hosel bore fit:

220300-P6

Standard Shim Bag of 6

- .370" tip adapts to fit .390" to .410" hosels
- .355" tip adapts to fit .370" to .390" hosels
- .335" tip adapts to fit .350" to .370" hosels

220301-P6

Oversized shims bag of 6

- .370" tip adapts to fit .390" to .450" hosels
- .355" tip adapts to fit .370" to .425" hosels
- .335" tip adapts to fit .350" to .400" hosels
