

Premium Skaft - NYHET!

Vi på **Custom Golf Scandinavia** är glada att presentera unika **Legacy Wood Shaft**, från Xcaliber Golf Shafts.

The Legacy Wood Series

The New Legacy Wood Series of shafts are the latest designs by our Founder – who's recognized as The Guru of Graphite Shafts Design.

As typical (with Robin?), the Legacy Wood designs come after over a year and a half of strictly controlled player testing and design iterations.

The Legacy woods come in 45, 55 and 65 grams all unique to each other.

Whereas most shaft companies take a single design and make it lighter or heavier, all three of the Legacy weight categories are completely unique to themselves.

Designed for all players from beginners to the most accomplished players on the planet...at 1/3 the cost of practically all the shafts out there!!

Priset för dessa skaft är:

4-Serien 1 652:- (3-P kostar det 1 344:- / st)

5 & 6-Serien 1 437:- (3-P kostar det 1 173:- / st)

Legacy 4 Wood Shafts

Most companies sub-50-gram shafts achieve that weight by reducing the stiffness of their shafts by an entire flex.

In other words, the shaft may say S-flex shaft but it's really an R-flex shaft when compared to the stiffness of their heavier shafts. **NOT the Legacy 4 designs!**

They are designed with a stiffness distribution that's equal to the same butt and zone tip stiffness as much heavier shafts.

For golfers of all abilities with smooth to quicker tempos and driver speeds up to 100mph. Expect a mid/high launch with medium to slightly lower spin to maximize distance.

Model /SKU Number	Flex	Recommended. Swing Speed (Driver MPH)	Trajectory	Wt. (gms.)	Len. (")	Bal. Pt. From Tip	Butt Diameter	Tip Diameter	Parallel Tip Section	Torque
Legacy 4-S	S	90-100	Mid-High	46	46	23.25	.600"	.335"	3.5"	4.9
Legacy 4-R	R	80-90	Mid-High	45	46	23.25	.600"	.335"	3.5"	5.0
Legacy 4-A	A	70-80	High	44	46	23.25	.600"	.335"	3.5"	5.3
Legacy 4-L	L	<70	High	43	46	23.25	.600"	.335"	3.5"	5.5

Legacy 5 Wood Shafts

The Legacy 5 designs were probably tested and iterated more than any of the other Legacy shaft designs.

The Legacy 5 wood shafts are *high-balance-point shafts* that make the shafts incredibly stable and LONG!

The shafts were designed for golfers with medium to even aggressive tempos with swing speeds up to 105 mph. Expect medium to high launch angles and medium to lower spin rates than most 55-gram shafts on the market to help maximize distance.

Model /SKU Number	Flex	Recommended. Swing Speed (Driver MPH)	Trajectory	Wt. (gms.)	Len. (")	Bal. Pt. From Tip	Butt Diameter	Tip Diameter	Parallel Tip Section	Torque
Legacy 5-S	S	95-105	Mid	56	46	24.5	.605"	.335"	3.5"	4.2
Legacy 5-R	R	85-95	Mid-High	55	46	24.5	.605"	.335"	3.5"	4.3
Legacy 5-A	A	70-85	Mid-High	54	46	24.5	.605"	.335"	3.5"	4.4

Legacy 6 Wood Shafts

For years, 65-gram shafts were the highest selling shafts in the entire golf industry. So the challenge was how to make these Legacy 6 shafts unique.

After hours and hours of testing and design iterations, the answer became obvious – *make the balance point VERY high*. Most “standard” 65-gram wood shafts on the market have a balance point around 23” from the tip.

The Legacy 6 wood shafts have a balance point at 24.5” which necessitated a unique stiffness distribution which maximizes your potential distance and control.

For golfers of all abilities, tempos and transitions with wing speeds up to 105mph. Expect a medium to high launch with reduced spin.

Model /SKU Number	Flex	Recommended. Swing Speed (Driver MPH)	Trajectory	Wt. (gms.)	Len. (")	Bal. Pt. From Tip	Butt Diameter	Tip Diameter	Parallel Tip Section	Torque
Legacy 6-S	S	95-105	Mid-High	66	46	24.5	.610"	.335"	3.5"	3.4
Legacy 6-R	R	85-95	Mid-High	65	46	24.5	.610"	.335"	3.5"	3.5

*Grattis till er alla, som vill vara med på denna **Legacy skaft** resan!*
